Doosan Infracore America is the fastest growing forklift business in the North American market, due to their consistency in maintaining a high level of consumer service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. forklift division based in Cleveland has a professional team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national machinery expansion project. Early product sales of this industrial equipment focused on large business communities, the armed services and on state-run firms. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo started the first home-based lift truck business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a situation of considerable expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This project proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added goods for export. In 1993, the company had a global sales network and started exporting designs they had developed through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
