

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this particular hydraulic attachment is utilized on forklifts so as to compress objects which you need to transport utilizing the forklift. Usually, they are utilized in order to paper rolls, barrels, and handle kegs, along with a few barrel clamp designs being able to revolve the cargo. For example, the revolving function enables the individual operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
